GLOBAL SYSTEMS ENGINEERING

Working with Global Demo Engineering for your Cisco Live Lab

Monica Balastik – mbalasti@cisco.com – Program Manager

Maria Zamora – mzamorab@cisco.com – Event Specialist

Cisco
Global SE

GDE Engagement

- How – Submit a request
 - For New Builds, Updates, and Booking Only requests
- Submit by Monday 10Nov25
- Will I be charged* to build my lab in dCloud?
 - **Not for Cisco Live**
- The dCloud Events team will book your sessions

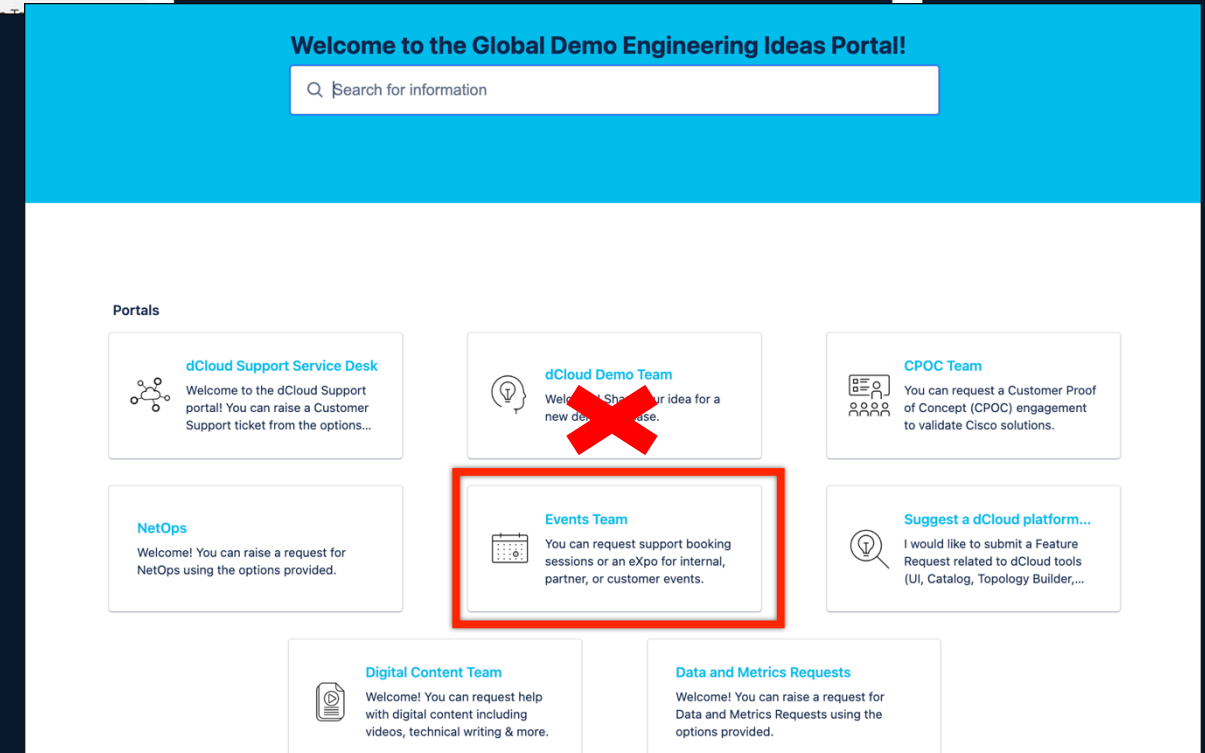

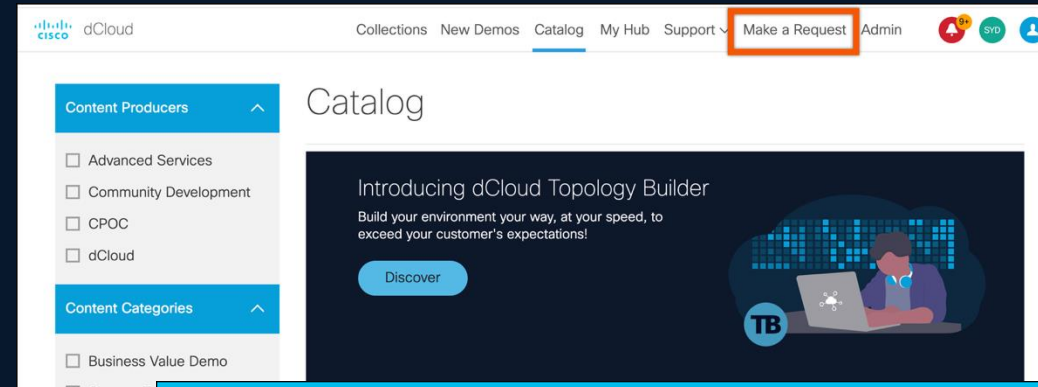

Working with Us – Process has changed

- You are encouraged to
 - Work in Topology Builder (TB or TBv3)
 - Use the Topology Builder Community to ask questions / receive guidance
 - Complete your lab building
- **Note:** Any topologies still in TBv2 needs to be converted to a TBv3 topology
- Webex Spaces
 - Will NOT be assigned a Community Developer Engineer
 - For specific processes, a Dev Engineer will be assigned as needed
 - Maria and I will engage with you in this space
 - Milestone Reminders
 - Session Booking information

Request Submission

- Submit your request at <https://dcloud.cisco.com>
- Click on the **Make a Request** link
- In the Portal select **Events Team**
- Project Name / Idea Title – use your lab name: LabID – Lab Title
 - For example: **LABCOL2004 – Webex Calling Lab**
- Use this for all dCloud lab builds
- Use this for all dCloud booking only requests*

*Please check your content to make sure licences haven't or will not expire before/during the event.

Idea Request Form Example

Required fields are marked with an asterisk *

Email confirmation to *

youremail@cisco.com

Request Description *

LABYYY-XXXX - Cisco Modeling Lab

Project Name/Idea *

LABYYY-XXXX - Cisco Modeling Lab

Please provide the project name or idea

Summary of Request

Normal text v B I ... A v [list icons] [link icon] [table icon] [code icon] [info icon] [quote icon] [minus icon]

Please include a description / lab details. (Do **not** include your lab abstract.)

Indicate if this is a booking request only. (You don't require any changes since the last delivery.)

Hey! Don't be shy.... help us help you! We need details about your request (use case, justification, architecture(s), user story, etc.) Thanks!

Lab Build Process

Lab Build Process

Baseline Development

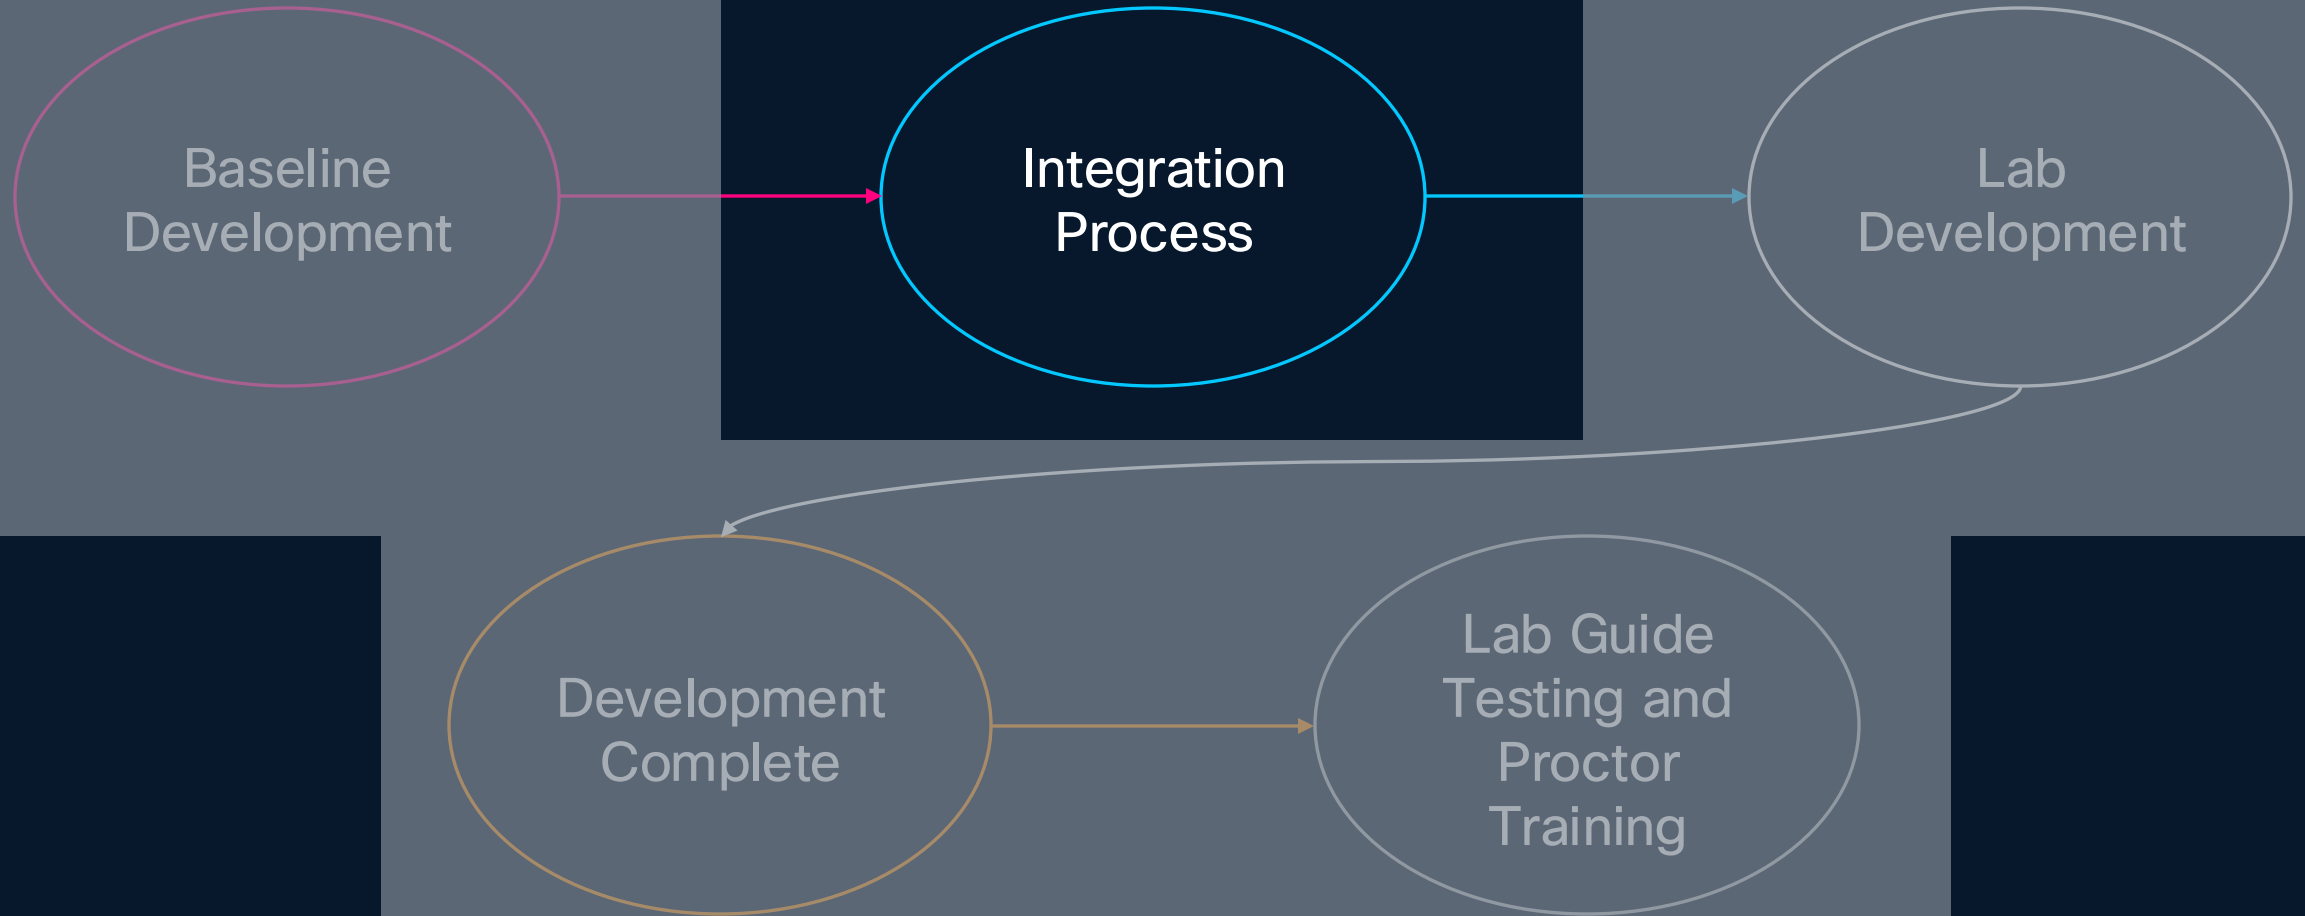

- Join the **dCloud Events Office Hours Webex Space**:
<https://eurl.io/#r0654DjsM>
- Join the **dCloud - Topology Builder Community** -
<https://eurl.io/#PXRpeYNX0>
- Use **Topology Builder** to move / add / change Virtual Machines
- New to building in dCloud? Watch the Videos in Topology Builder and join the Topology Builder Community Webex space and Office Hours calls
- We will create a Webex space for your lab or revive the one used at a previous Cisco Live

Note: A dCloud Developer Engineer will be assigned only as needed.

Office Hours

- Office hours
 - Opportunity to learn about eXpo, Event Scheduling, and Topology Builder
 - Ask questions
 - Suggest topics where clarification is needed
 - Webex Space – [join](#) for **calendar invite** and to submit questions for the Office hours.
- SharePoint:
 - Office Hours Schedule
 - Topics covered
 - Where to look for more information
 - Site is coming soon!

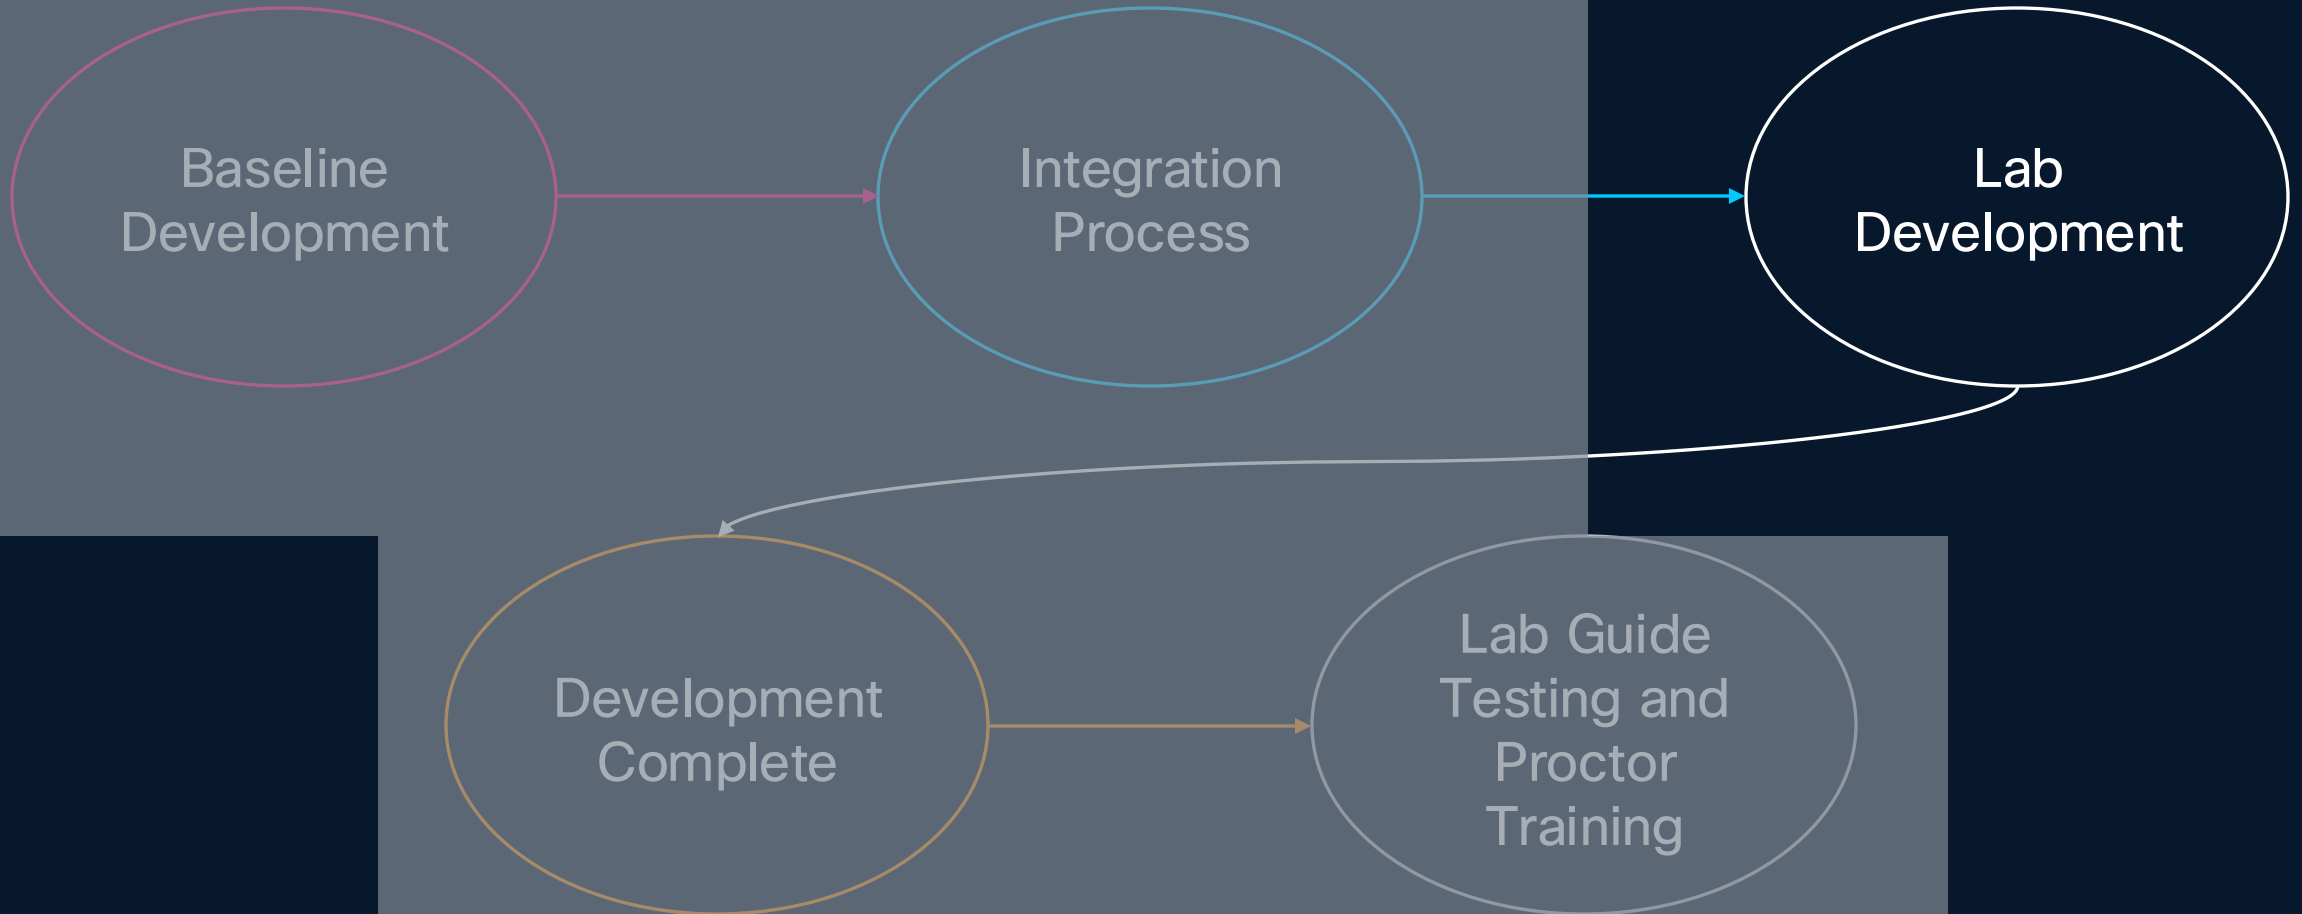

Lab Build Process

Integration Process

- Completed once your baseline is set
- Consolidation of topology builder modifications and Saves from any VM Updates performed
- Required for any Event booking – Event Scheduling or eXpo booking
- VM replacements can be done further in the build process
- Addition or removal of VMs after this process is complete requires a brand-new Integration
- Can take a few days to complete
- Our booking process can start

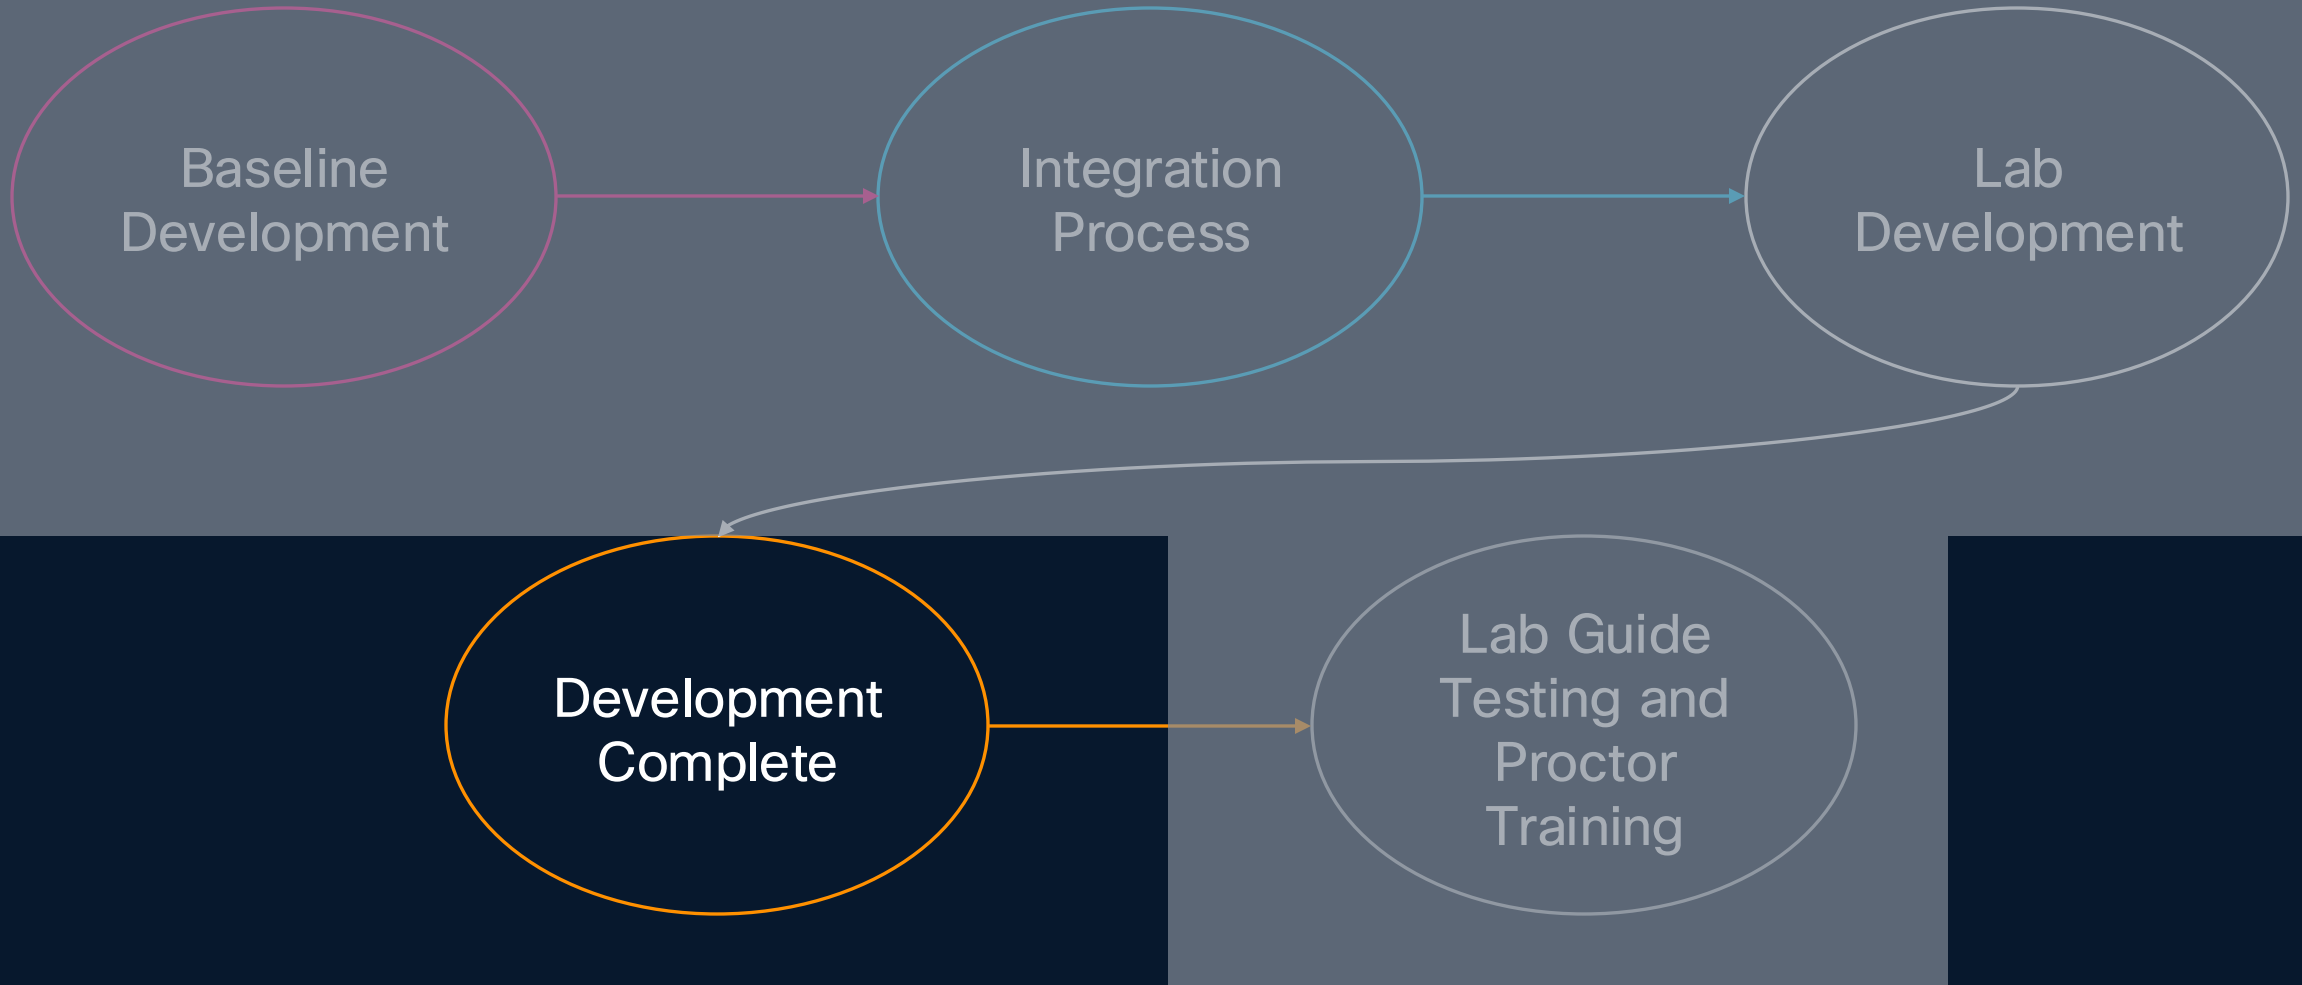

Lab Build Process

Lab Development

- You are responsible for building your lab, not a dCloud Developer Engineer
- Use this time to
 - Build or update your lab guide
 - Identify any missed vm configurations
- This is where the bulk of your time should be spent

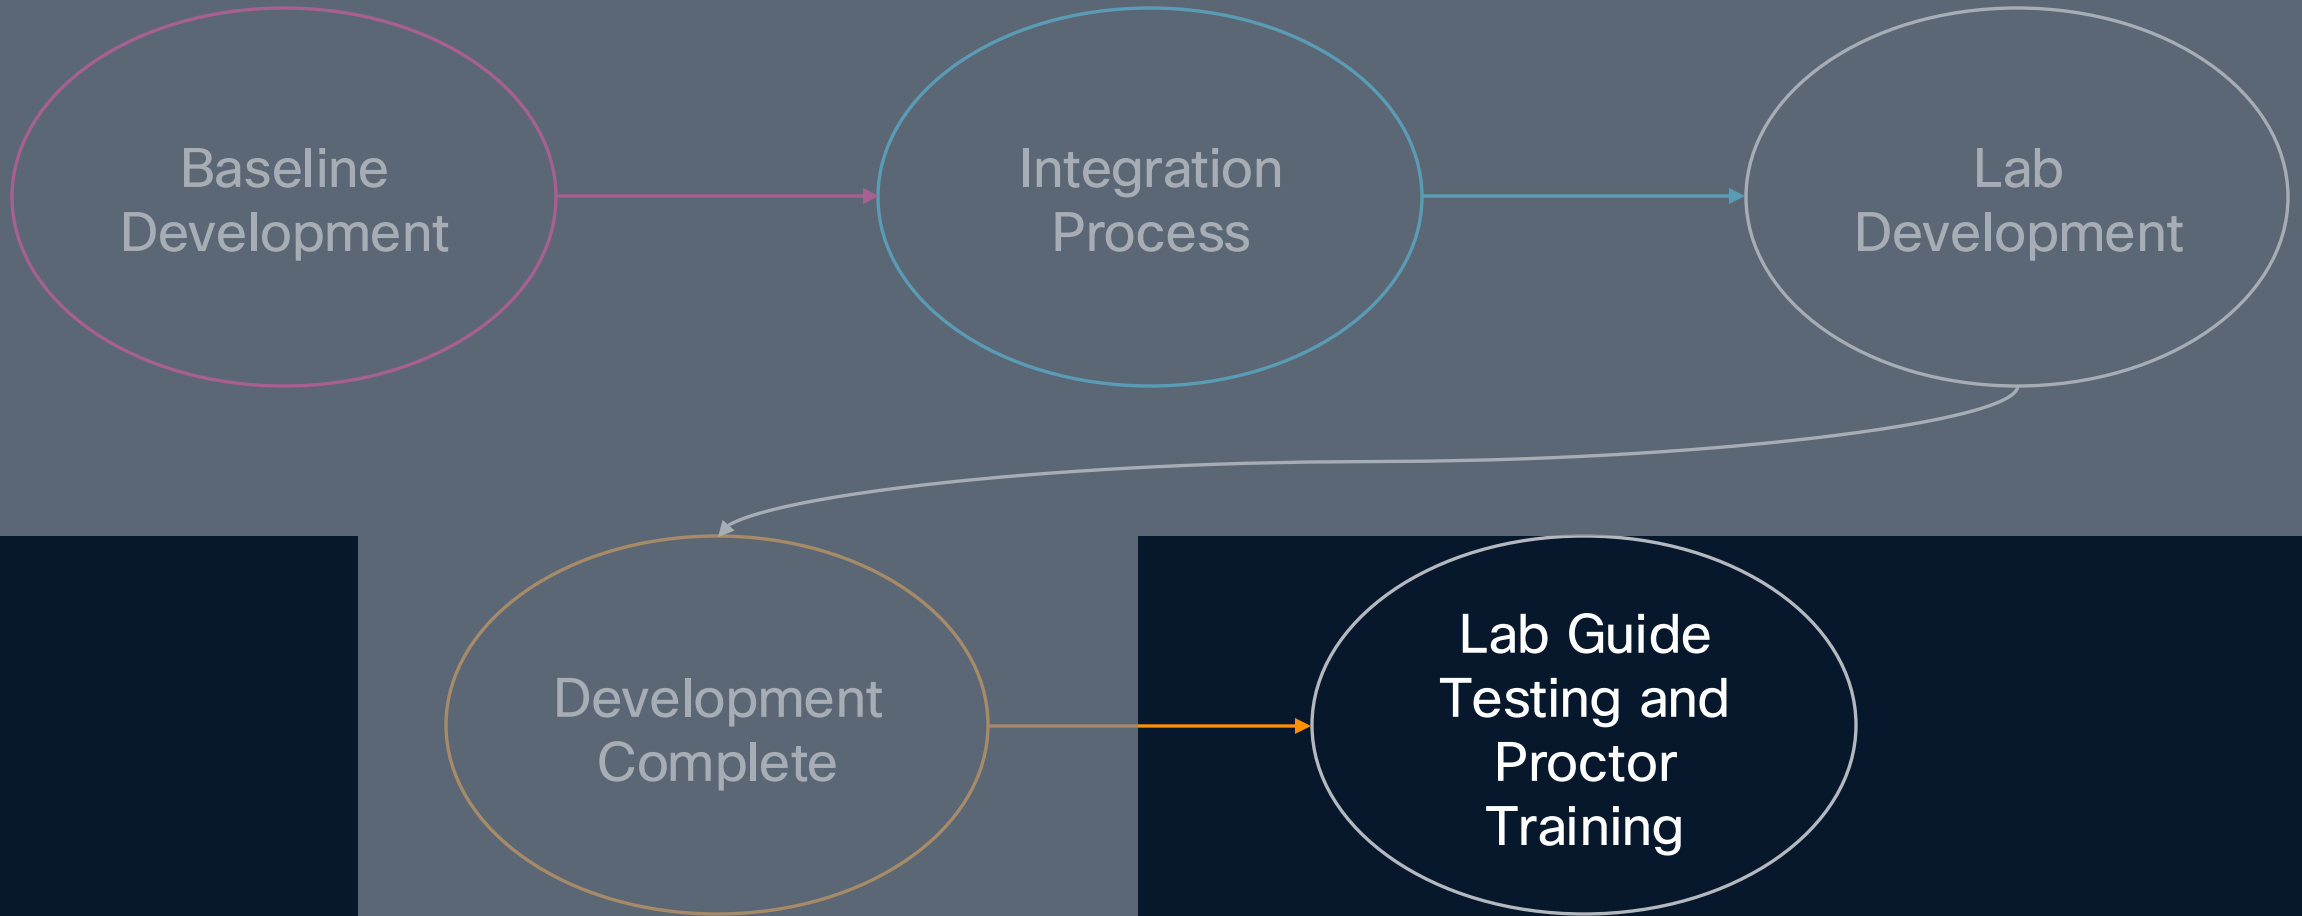

Lab Build Process

Development Complete

- Notify us of any VMs that need to be replaced or
- A new Integration is required due to a major topology change
- Time for us to complete the booking process

Lab Build Process

Lab Guide Testing and Proctor Training

- Lab testing by someone outside of your team
- Proctor training
- Time for us to complete the booking process

Quick eXpo Update

- Session View
 - Ideal for Console connections
- Session ID
 - For providing session specific assistance

My current lab...

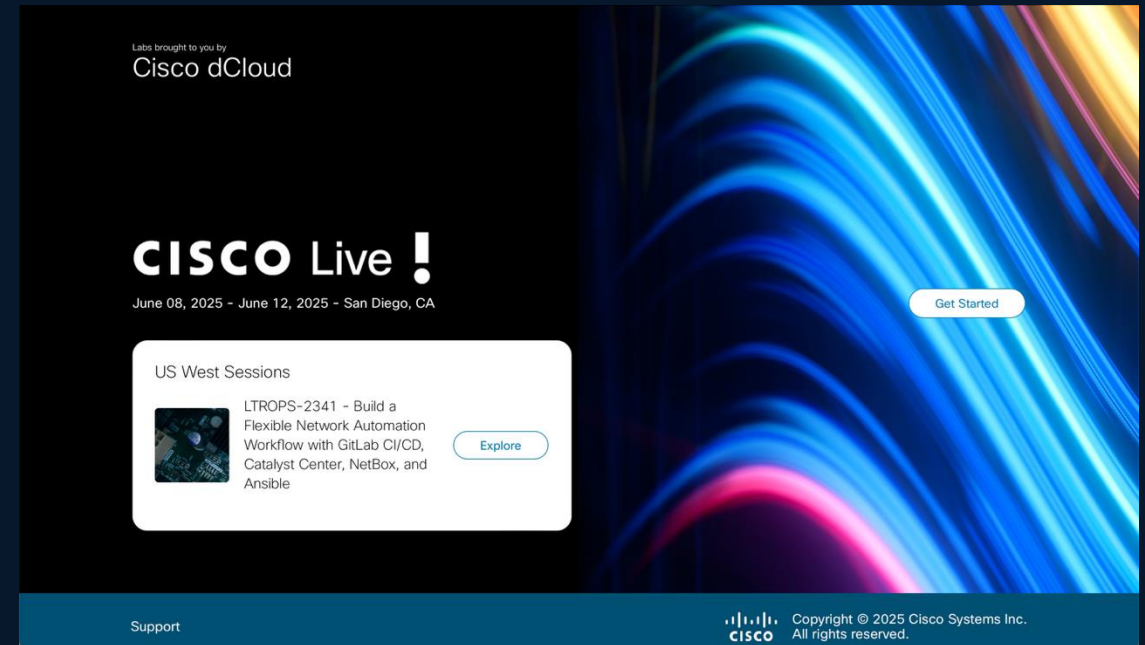

- Lives outside of dCloud
 - Have the option to use eXpo
 - If you have http or https access, we can set up a pointer to your lab and use Cisco eXpo.
 - You will need to manage distribution and resetting of your pods
- Cloud Based Labs
 - AWS
 - We have the capability to create accounts dynamically
 - Our Developer Engineers need to discuss with you costs and # of Seats
 - Open an Event Request with us
 - Microsoft Azure
 - You will need to procure your own account
- Requires Hardware
 - We may have something already in our catalogue that you can use or use as a starting point.
 - We've added several Sandboxes which contain HW (numbers are limited!)
 - We are able to host labs with equipment please start the discussion with us now
 - You are responsible for procuring any equipment for your labs
 - If you already have a lab with equipment and want to tie into a virtualized environment – reach out

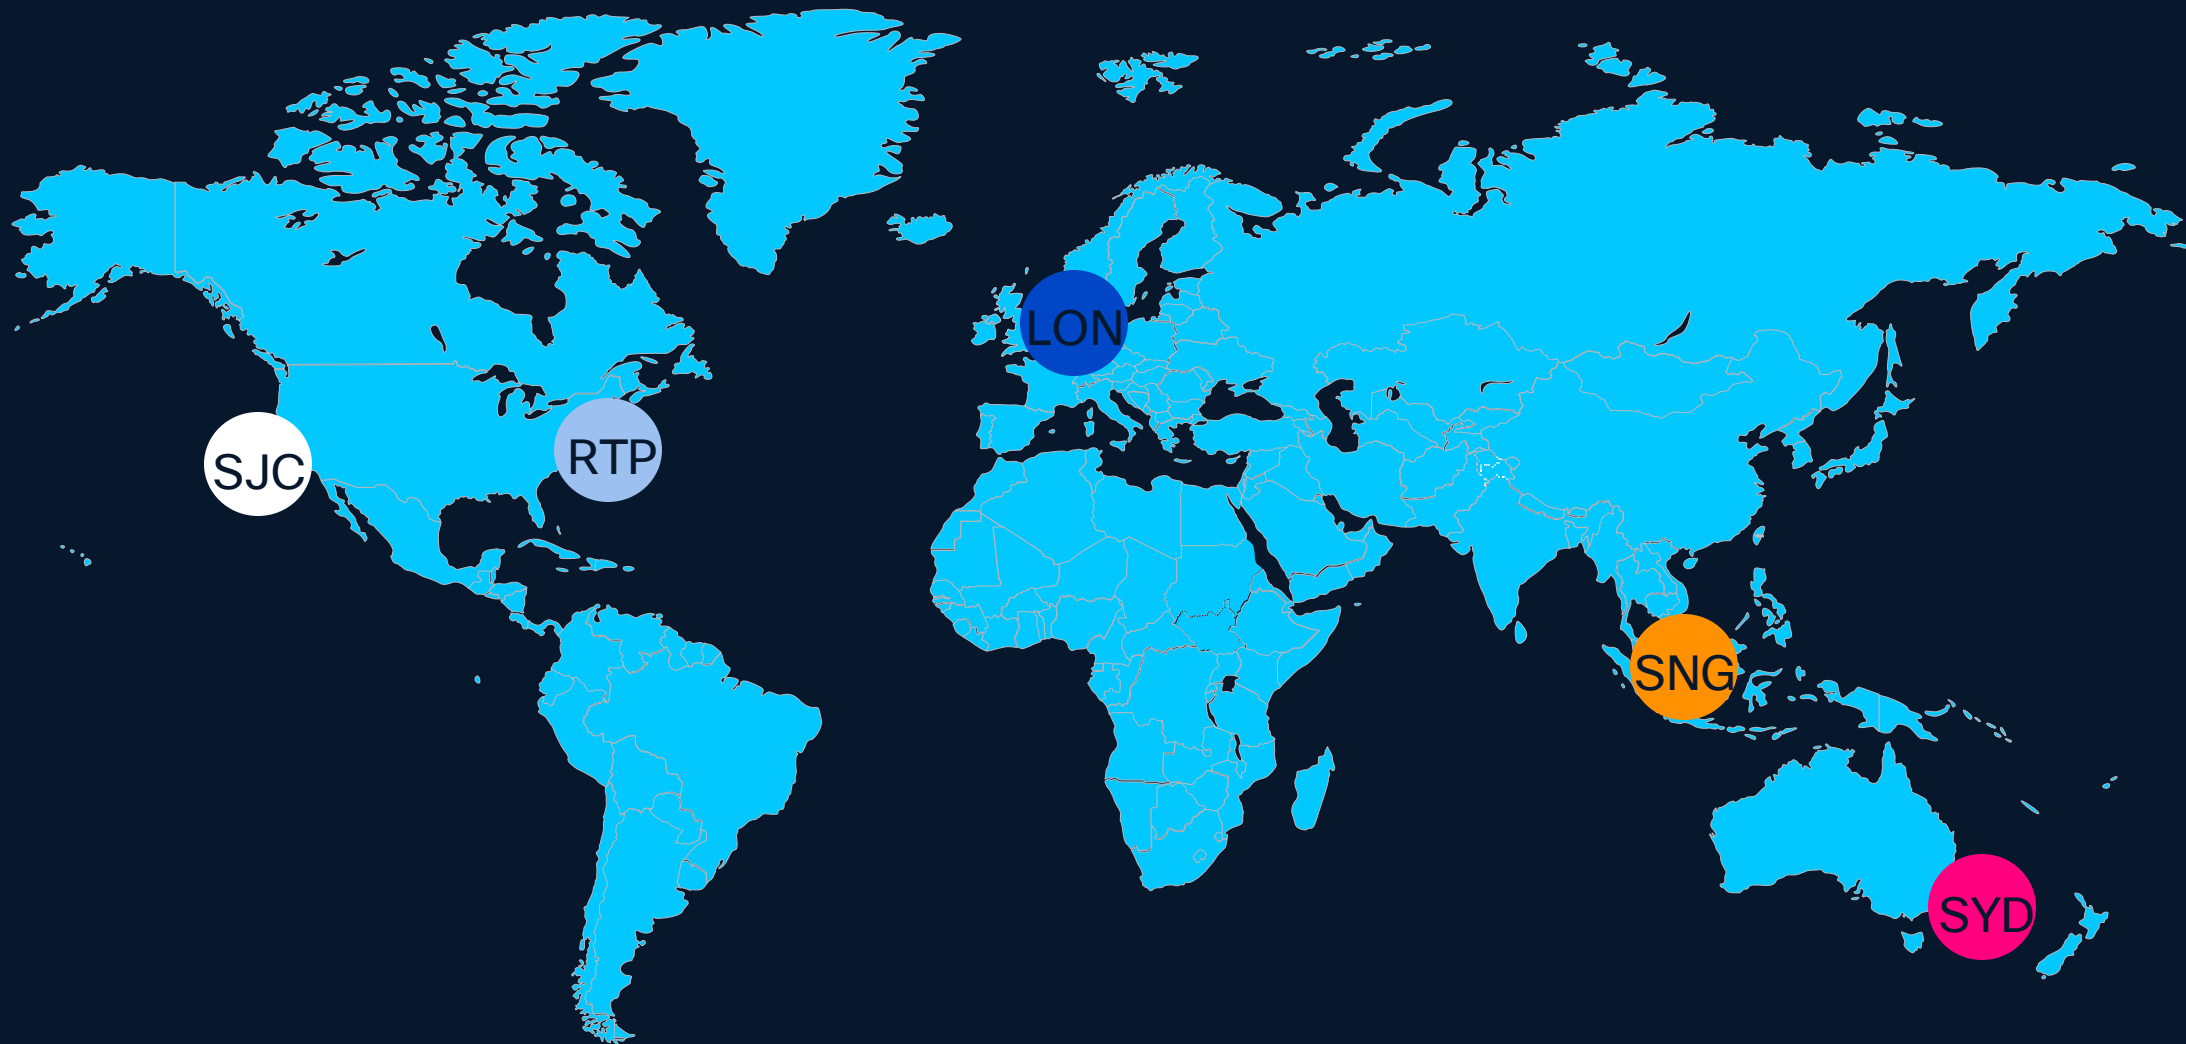

Lab Delivery – eXpo or Event Scheduling

- WIL – Recommend Cisco eXpo
 - Pool of running sessions instantly available
 - No user login required
 - Auto session replacement over a period of time
 - Limited session control
 - Session View
- ILT – Cisco eXpo Optional
 - Pool of running sessions instantly available
 - No user login required
 - Session View
